Passage set convenience

When Trilock® is unlocked and the button has not been pressed, it operates as a standard passage set, allowing free access in or out of the home.

Lockset with safety

Pressing the button on the inside of the door engages the Trilock® lockset mode. This locks the door from the outside, however it is safe to exit without a key in an emergency by simply turning the inside knob or lever.

Deadbolt security

Trilock® houses a key-operated double cylinder deadbolt, with a sturdy 20mm throw, to keep possessions and valuables safe whilst the home is unoccupied.
