A first impression to last a lifetime

Entrance doors continue to be the show piece of the modern home, used to create a visual statement and a first impression that welcomes you and your guests. While copper is emerging as one of the latest design trends with its gold hues giving it a sense of elegance and an earthy feel that brings warmth to any home, adding a copper statement piece to your entrance just makes sense.

While copper is extremely aesthetically pleasing, it also has an inherent ability to kill a wide range of harmful microbes relatively rapidly – often within two hours or less which makes it the perfect metal to use on a door with a lot of use. This plus its durability makes it perfectly suited to New Zealand’s coastal environment and will last a lifetime. The natural tendency of the 100% hand finished pure copper is to show its perfect imperfections, a realness that will age organically over time. This ageing process can give a sense of life and history to the hardware.

However, if the “as new” look is desired, then maintenance with an approved cleaner will ensure the mirror finish will always be maintained.

Miles Nelson now have two exquisite styles available, a square or round pull handle option supported by a matching range of copper accessories, all designed to create a high end aesthetically pleasing entrance to your home.
