

# MNC DOOR LEVERS

## BUILDING PRODUCT INFORMATION REQUIREMENTS DISCLOSURE

### DESCRIPTION & INTENDED USE:

Commercial door levers are specialized handles designed for use in commercial settings, particularly in areas like bathrooms, where a durable and easily operable door mechanism is essential. These door levers are distinct from traditional doorknobs and are characterized by a lever-shaped handle that can be easily pushed down or pressed, facilitating a smooth and effortless operation. The construction of commercial door levers typically involves sturdy materials such as metal or high-impact alloys to withstand frequent use in high-traffic environments.

The intended use of commercial door levers in general is to provide a practical and ergonomic solution for opening and closing doors in commercial spaces. These levers offer a user-friendly alternative to traditional doorknobs, allowing individuals to use their hands more easily, even when carrying items or when accessibility is a concern. In commercial bathrooms specifically, door levers contribute to convenience and hygiene, enabling users to operate the doors with minimal effort. Additionally, commercial door levers often come with features such as privacy locks or indicators to enhance security and maintain privacy when needed. Overall, the design and functionality of commercial door levers aim to meet the demands of frequent use, enhance accessibility, and ensure efficient and reliable door operation in commercial environments.

### RELEVANT BUILDING CODE CLAUSES

Building Regulations 1992, Section D1 - Access routes

D1.3.4 (f) - have doors and related hardware which are easily used.

Miles Nelson door closers comply with D1 access routes by virtue of easily functioning door hardware that controls the opening and closing speed of the door for those using wheelchairs or aid supports.

Access Standard: NZS 4121:2001 Design for access and mobility.

### CONDITIONS OF USE

Miles Nelson door levers should be mounted according to the supplied installation instructions.
