

# A GUTTER'S BEST MATE

Protect your home with a simple drop-in insert that stops leaves and debris from blocking your downpipes, even when your gutters are full.

- Prevents overflow & water damage
- Installs in seconds, no tools needed
- Fits all standard downpipes including 90mm round & 100x75mm rectangular downpipes
- One Flowmate per downpipe outlet

#### Traditional gutter guards?

They often clog or hide debris, and can make cleaning harder.

#### Flowmate?

It solves the problem at the source, the downpipe opening, without covering your entire gutter.

#### How to Use Flowmate

1. Place the plate over your downpipe outlet
2. Drop Flowmate into position
3. Snap it on, you're done
4. No screws, no tools, no fuss.

**Smart, low-maintenance  
protection, tradie-trusted and  
made for NZ weather.**

Ideal for homeowners and gutter cleaning professionals  
Available now from Miles Nelson & Miles Nelson stockists

#### Why Flowmate Works

Blocked downpipes are the real danger, not just full gutters. Water backs up, overflows, and damages your roofline, walls, and foundations.
