Miles Nelson 8mm thick neodymium door magnets provide increased holding strength and a more positive close.

Designed for applications where standard magnets aren't enough, these offer reliable performance with a solid, quality feel in use.

Features

- 8mm thick neodymium magnet
- Increased holding strength
- Smooth, consistent engagement
- Fixings and buffer supplied
- Available with or without cups

See page 94

See page 40

Things to Consider

Types of door functions

Entrance:	Exterior doors – internal locking with turn or button, key access from outside.
Deadbolt:	Single cylinder key and turn or double cylinder key locking from both sides of the door.
Passage:	For general interior or hallway doors (non-locking operation).
Privacy:	For bedroom or bathroom doors (internal locking, emergency access from outside).
Dummy:	For wardrobe and cupboard doors (fixed lever).

Thickness of the door

Most interior door thicknesses range from 33-40mm. Exterior door thicknesses are between 40-45mm. Both Milano & S-Range are suitable for door thickness: 32-45mm. If your door's thickness differs from these standards, you may need to purchase conversion components to ensure the hardware will work with your door.

Door handing

Stand on the secure side of the door (where you would insert your key, or an unlocking tool if it was a privacy set). For interior doors you should stand on the side that you would enter from, i.e. In the hall if opening a hall cupboard door, in the bedroom if the door opens to an ensuite and in the hall if opening into a living room.

Replacing hardware

If you are looking to replace hardware on an existing door, or a door with pre-drilled holes, you'll need to measure the diameter of the holes and make sure that the hardware rosette will cover the openings.

Measure the backset: the distance from the door edge to the centre of the handle or key barrel and the width of the door stile: which is the vertical panel at the edge of a frame and glass panel door, where the door hardware is installed.

The width of the door stile is important when selecting a lock or handle with the correct backset, particularly if the door is panelled as this reduces the available area to install hardware.

Finish Glossary

When choosing a finish, keep in mind that oil-rubbed bronze, antique bronze and copper are all living finishes that will change over time. Polished brass can tarnish if used outside, to avoid tarnishing it is best to keep it clean and wax it lightly with an appropriate product. Another exterior option to consider is stainless steel.

There are two standard grades of stainless steel: 304 for exterior use in non-coastal areas and 316 for exterior use in properties within 500m of the ocean.

This is especially important to consider in New Zealand with our close proximity to the ocean. Stainless steel can also be cleaned using an appropriate cleaner.

For a clean, contemporary look we also offer the recently launched range of entry and internal door hardware and door stops in a matt black finish.

Please refer to the common finishes glossary below and listed with each product when making your selection.

Antique Bronze - AB

Black Chrome - MBC

Brass Finish - BR

Chrome Plate - CP

Copper - CU

Florentine Bronze - FB

Satin Brass - SB

Matt Black - BLK

Polished Stainless Steel - PSS

Powder Coat White - PW

Satin Anodised - SA

Satin Chrome - SC

Satin Graphite - SG

Satin Nickel - SN

Stainless Steel - SS

Uncoated Raw Material - RM

Our door hardware and window fittings are available in a range of finishes to suit any design style. Select products can also be custom finished for a more personalised look.

DIGITAL LOCKS

2

YEAR ELECTRIC & MECHANICAL WARRANTY

D-Lock Digital Entry Lock

The D-Lock digital lock range is expanding with a new stainless steel finish and short lever variants, delivering a sleek, durable option for modern residential and commercial doors.

The updated models feature a refined lever with a chamfered corner, making installation easier in tight edge-to-door situations where space is limited.

Suitable for aluminium or timber doors, the stainless steel D-Lock offers the same reliable keyless access, smart connectivity, and secure performance the range is known for - now with improved installation flexibility and a premium architectural finish.

Key Highlights

- New stainless steel finish
- New short lever variant
- Chamfered lever corner for improved installation
- Ideal for tight edge door applications
- Compatible with the D-Lock digital access system
- Suitable for residential and commercial installations

Obliq Lever **NEW**

The **Italian design** OBLIQ Door Lever in Matt Black is an Italian design and is defined by its clean geometry and understated profile. The concealed rosette creates a flush, minimal appearance, making it suitable for contemporary residential and commercial interiors.

Manufactured from **recycled aluminium**, the handle combines material efficiency with long-term durability. Aluminium offers high resistance to wear and can be reused without loss of quality.

Installation requires three standard screws, with a thread-locking grub screw for secure fixing.

The Matt Black finish is **GRADE 5 certified for salt spray corrosion resistance (EN 1670, over 480 hours)** and **ISO 0 rated for surface adhesion**, providing reliable protection in demanding environments.

S-Range

The S-Range consists of a collection of contemporary lever designs in trendy finishes. Together with a unique interlocking system the S-Range provides a quality durable handle solution.

The base rosette is 65mm in diameter, making it an ideal handle for a retro-fit /DIY job, covering existing holes and marks. The range comes standard with a round rosette cover, however a matching square rosette is also available to purchase as an accessory.

All lever styles are available in:

Passage Set

Includes lever set and 60-70mm adjustable tubular latch

Integrated Privacy Set

Includes privacy lever set and 60mm privacy tubular latch (70mm available separately)

Dummy Handle

Includes fixed dummy lever, face fixed, non-handed, (one handle only).

- S-Range handles are non-handed and fit both left and right handed doors
- Fits 54mm existing hole sizes. Ideal for retro fits
- The Integrated Privacy Set has an auto release function that deactivates the lock by simply pushing the inside handle down.
- S-Range levers come with an **7.6mm spindle**

Square Rosette Cover

All S-Range handles are supplied with a round rosette. Square rosette covers are available separately in any of the finishes.

- Features unique locking lugs to ensure it remains square on the door.

SELIM HINGE

Selim Interfold Hinge

- **Robust Strength:** Built from high-strength alloy, capable of supporting doors up to 100kg (with 3 hinges).
- **Quick Installation:** Integrated wing locator for precise and efficient fitting.
- **Smooth and Quiet Operation:** Flanged nylon bushes and stainless-steel hinge pins for enhanced longevity and performance.
- **Corrosion Resistance:** 6mm stainless-steel pins with machined chamfered ends for durability.
- **Secure Assembly:** Aluminium fitted endcaps for performance and durability.
- **Versatile Use:** Suitable for aluminium entrance doors and timber door applications.
- **Minimum Door Thickness:** 40mm.
- **Door Closer Compatibility:** Use at least 3 hinges when installing with a door closer

Or scan the link below:

LED READY BANNISTER BRACKETS

Designed for bold, contemporary interiors, this matt black LED-ready bannister bracket combines striking aesthetics with practical innovation. Made from durable 304 stainless steel, it features a hollow construction that allows for hidden wiring, making it perfect for backlit handrail installations. The matt black finish provides a clean, modern contrast, while concealed fixings maintain a seamless look. Suitable for interior and exterior use, with fixings included for easy installation.

- Designed with wiring capability so the handrail can be backlit
- Stainless steel 304 grade material
- Suitable for interior and exterior use
- Concealed fixing
- Fixings included
- SS, Matt Black & Satin Graphite finish options

LUMOS®

The revolutionary Lumos® LED bannister bracket seamlessly blends function and design by providing lighting within a bannister or railing bracket body.

This development simplifies the installation of safety or railing illumination into one stylish bracket.

The brackets use low energy consumption LED bulbs with a life of approximately 12 years under continuous use. The light does not produce heat and is therefore safe to touch. **Recommended bracket spacing is 900mm, as light coverage area at maximum height is 900mm.** One transformer can power up to 16 brackets containing LEDs.

Requires the use of a Miles Nelson regulated power transformer, supplied separately. Complies with BIA acceptable solution D1/AS1. Can also be used with photosensitive sensors for night lighting.

Lumos Brackets are designed and manufactured in New Zealand. Spacing of brackets 900mm apart.

- Lumos® bannister bracket
- 12 volt LED downlight
- Very low power consumption
- Cool running
- Adapter for flat profile rails
- Concealed fixing
- Fixings supplied

DESIGNED BY
MILES NELSON

INTERIOR/EXTERIOR
USAGE

Lumos® Transformer

- 12 volt
- Each transformer can power 16 lights
- Tested to AS/NZS3108 at 25°C

7. Damage to or deterioration of plated finishes (soft finishes) or finishes exposed to a corrosive environment. As deterioration is possible under some environmental conditions.
8. Any modification or repairs to a product, as supplied unless authorised by Miles Nelson.
9. Use of replacement parts other than authorised parts.
10. Malfunction or failure of the product due to the use of non-genuine Miles Nelson parts.

5 YEAR WARRANTY

Products covered: All General Hardware Products including Bannister Brackets, Bathroom Fittings, Cabinet Hardware & Handles, Cabin Hooks, Door Fittings, Door Stops, Hinges, Hooks, Kickplates, Push Plates, Grab Rails, Letterbox Letters & Numbers, Neck Bolts, Security Fittings (excluding the Patio Bolts, Mini Bolts, Restrictor Stays and Security Window Stays) and Socket Bolts.

These products are warranted to be free from mechanical and workmanship defects for 5 years from the original date of purchase.

If a mechanical defect occurs simply return the product together with proof of purchase to point of purchase for replacement.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of paints, solvents, acid cleaners or scratching from keys is not considered a defect in the finish and is not covered by the warranty conditions.

Likewise the warranty does not cover damage caused by incorrect installation, accident, neglect or other factors over which Miles Nelson has no control and as such Miles Nelson shall not be held liable for any losses or expenses such as loss of use, damage to property or consequential damages or expenses.

10 YEAR WARRANTY

Products covered: Miles Nelson Commercial Door Furniture, Miles Nelson Commercial Door Closers, Door Handles & Pulls, Restrictor Stays, Security Window Stays, Patio Bolts and Mini Bolts, Rollers, Barndoors, Cavity Slider Sets, Gripsets, Cambridge & Hawthorn Leversets, Olympus & Bala Knobsets.

These products are warranted to be free from workmanship defects for 10 years from the original date of purchase. If a defect is detected simply return the product together with proof of purchase to the supplier for replacement. Products are designed for interior residential applications, unless otherwise stated.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of ammoniated detergents, metal polishes, solvents, corrosive environments or other abrasive agents or scratching from keys is not considered a defect in the finish and as such is not covered by the warranty.

Likewise, the warranty does not cover damage caused by incorrect installation, accident, neglect or other factors over which Miles Nelson has no control and as such Miles Nelson shall not be held liable for any losses or expenses such as loss of use, damage to property or consequential damages or expenses.

10 YEAR MECHANICAL WARRANTY

Products covered: S Range and Milano door handles.

These products are warranted to be free from mechanical and workmanship defects for 10 years from the original date of purchase. If a mechanical defect occurs simply return the product together with proof of purchase to point of purchase for replacement.

This warranty does not cover the finish, defects or damage arising from improper installation, incorrect product application, improper maintenance, storage, shipping, handling or normal wear and tear or products used in commercial applications as "Commercial" is defined as any application other than those found on private residences.

25 YEAR MECHANICAL WARRANTY

Miles Nelson Manufacturing Ltd guarantees its products against defects in workmanship and materials. Should the product develop fault within its normal working life, Miles Nelson will repair or replace product of the same or equivalent product free of charge. Miles Nelson Manufacturing Ltd assumes no liability under this guarantee for the following.

1. Incorrect installation or failure to follow instructions.
2. Failure through improper maintenance or fair wear and tear.
3. Loss or damage costs incurred either indirect or consequential.
4. Cost of removal, replacement, and/or travelling time.
5. Any modification to the product from its original supplied operation design.
6. Plated finishes deterioration under some climatic conditions or chemical environment are exempt from this guarantee.

Miles Nelson Manufacturing Ltd reserves the right to determine whether or not any fault is caused by defects in workmanship or that any product is defective. Product specification and design improvement may change as a result of our continued commitment to quality, materials and development program. Consumer Guarantees act does not apply.

B BRASS LIFETIME GUARANTEE

The lifetime warranty covers the integrity of the product(s) base material and as such the product is guaranteed to be free from material defects for the lifetime of the product.

The product finish is subject to the same conditions that apply to the 5 year warranty, as above.

While copper is extremely aesthetically pleasing, it also has an inherent ability to kill a wide range of harmful microbes relatively rapidly – often within two hours or less, which makes it the perfect metal to use on a door with a lot of use. This plus its durability makes it perfectly suited to New Zealand’s coastal environment and will last a lifetime. The natural tendency of the 100% hand finished pure copper is to show its perfect imperfections, a realness that will age organically over time. This ageing process can give a sense of life and history to the hardware.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of paints, solvents, acid cleaners or scratching from keys is not considered a defect in the finish and is not covered by the warranty conditions.

However, if the “as new” look is desired, then maintenance with an approved cleaner will ensure the mirror finish will always be maintained.

Clean regularly using Brasso or something similar with a soft cloth or soft brush. Do not use abrasive cleaners or a scouring pad of any type as they may cause excessive wear and dull the finish.

316 QUALITY STAINLESS STEEL

304 QUALITY STAINLESS STEEL

S QUALITY STAINLESS STEEL

There are two types of stainless steel commonly used in the hardware industry, 304 grade and 316 (marine) grade. 316 grade stainless has molybdenum as an additive that improves its resistance to pitting and corrosion and should be used when exposed to seaside conditions.

With a little bit of care you can minimise, if not prevent tea staining and get years of visual enjoyment from your stainless steel.

Tea staining can be described as: discolouration of the surface of stainless steel that does not affect the structural integrity or the longevity of the material. Tea staining of stainless steels occurs most commonly in coastal areas and becomes progressively worse the closer you get to water (note that most of New Zealand is considered a coastal area). Other factors such as pollution, higher temperatures and humidity can also increase the effect.

To prevent tea staining, perform regular maintenance – wash regularly with clean fresh water, mild detergent and a cloth or soft brush. After washing rinse in clean water and wipe the surface dry with a soft absorbent cloth remembering to go with the grain on brushed stainless steel. Generally, you should wash your stainless steel every time you wash your windows or every three months. Do not use abrasive cleaners or a scouring pad of any type as they may cause excessive wear and dull the finish.

WEBSITE UPDATE B2B TRADE PORTAL

We've launched a new trade portal exclusively for our wholesale customers. Designed to streamline your ordering process, the portal offers real-time stock updates, instant pricing, and much more. With these features, managing your orders has never been easier or more efficient, saving you time and boosting your business productivity.
